

For Immediate Release

TOP TEN GLOBAL PHARMACEUTICAL COMPANY SELECTS DATAVAIL

BROOMFIELD, Colo., Feb. 9, 2010 – [Datavail](#), the largest provider of database experts on demand, announced today that it was selected by one of the top ten global pharmaceutical companies to remotely operate [Oracle](#) and [SQL database systems](#). As the selected provider, Datavail will deliver a comprehensive database administration solution including 24x7 monitoring, alerting and incident resolution and expert support.

“Relational database management systems require a high-level of expertise by corporate teams,” said Sloane Stricker, senior vice president and CIO of Datavail. “Large companies choose Datavail because of our ability to successfully achieve core database management objectives. Many companies are operating with tighter budgets and increasing workloads. By engaging with Datavail, companies can take advantage of our DBA teams to help improve efficiency and reduce overall expenditures on systems management. We act as an extension of internal teams to ensure that strategic initiatives as well as day-to-day tasks have the appropriate coverage.”

Datavail provides remote database management services for companies using SQL, MySQL, Oracle, and Oracle E-Business platforms. Datavail can lend its skills to IT departments on an ongoing basis, acting as a pool of DBA knowledge and manpower that can be drawn upon by IT managers to support DBA teams when required.

“Attention to client needs and our database administrators’ active approach to customer service has helped us to establish a reputation not only as database experts, but also as collaborators that produce strong results,” said Mike Jones, president and CEO of Datavail. “Our proactive approach to customer service set us apart from the competition and we’re thrilled to be working with one of the top 10 pharmaceutical companies in the world.”
