

## Case Study

# Financial Services Company

## Remediates over 1,000+ Application Defects

A financial services company which provides title insurance and settlement services to the real estate and mortgage industries had 20-30 product applications. Among them, the security compliance team identified over 1,000 defects that had to be remediated in order to be brought into compliance.

# Technology

- VB6
- VB.NET
- ASP.NET

## The Challenge

- The current App Dev team did not have the time to remediate the defects since they were focused on other high value strategic projects.
- With over 1,000 defects, the client was carrying a great deal of liabilities, both from security threats, as well as regulatory risks.
- Much of the budget was tied up in this, delaying new projects.

## The Solution

Datavail delivered Sprint Teams as a Service (STaaS):

- Multi-skilled team consisting of on/offshore resources with a competitive blended rate.
- Focus was to execute the following three steps:
  - Identify all 1,000+ defects
  - Prioritize the remediation efforts
  - Get to work!

## The Results

Datavail's Sprint Team delivered phenomenal results, including:

- Remediated 99% of the defects
- Completed the project in half the time and with 50% of the budget
- Greatly reduced the security and regulatory liabilities.
- Gave the company's app dev team the freedom to deliver strategic corporate development initiatives.
- Freed up more available budget for new projects.
