

Case Study

Safety Systems Manufacturer

One of the world's leading manufacturers and marketers of vehicle lighting and safety systems needed to streamline the planning & budgeting process and add strategic modeling capabilities to their systems.

Legacy Product

- Excel

Problem

The company had several challenges including:

- Time-consuming manual Excel-based process
- Limited reporting capabilities
- Adding products and making acquisitions which created a need for strategic modeling

Solution

The organization implemented the Oracle EPM Cloud Planning & Budgeting module. They gained the following benefits:

- A streamlined planning and budgeting process
- Customized management reporting
- Ability to perform ad-hoc analysis quickly
- On-going managed services from Datavail

Results

As a result of the move the cloud, the company achieved:

- Increased workflow capabilities and automation
- Improved collaboration
- Enhanced reporting and analysis
