

## Industrial Manufacturing Case Study

### Introduction

Major North American high-quality transportation manufacturer with over 1,000 employees and high standards for quality, safety, and on-time completion was looking for a new, more efficient, cloud-based planning and budgeting process.

“Thanks for all your effort, now your effort paid off – our PBCS is live. I am very happy to work with you in the last 2 months, I learned a lot from you for the new PBCS application. Your knowledge, professionalism, dedication, and self-driving absolutely impressed me.”

### Products Used

Oracle Enterprise Planning & Budgeting Cloud Service

### Challenge

Budgeting and forecasting at the organization was cumbersome due to their on-premises system and the company was looking to automate their data integration.

Some of their challenges included:

- Existing systems failed occasionally
- Getting back online was laborious
- Hardware and application maintenance was cumbersome

### Solution

The manufacturing company partnered with Datavail to implement Oracle's Enterprise Planning Budgeting Cloud Service (EPBCS) to replace their existing on-premises system. EPBCS was implemented using the lift and shift method to migrate data with added customization needed based on the customer requirements.

### Benefits Achieved

- Smooth transition to the cloud
- Cloud flexibility
- Licensing flexibility
- Relief of the cumbersome support structure for on-premises

#### About Datavail

Datavail provides a broad range of services in support of databases, analytics, and applications and specializes in Oracle, Oracle E-Business Suite, OBIEE and OBIA, Hyperion, Microsoft SQL Server, MySQL, MongoDB, DB2 and SharePoint.
