

International Security Company Case Study

Introduction

This International Security Company provides electronic security, interactive home and business automation, and related monitoring services in the United States and Canada.

Products Used

- Oracle Data Relationship Management
- Datavail DRM PeopleSoft Adaptor

Challenge

- Profound duplication of effort regarding chart-of-accounts maintenance & mapping
- Chart of Accounts and corporate hierarchy maintenance was manual, error prone, and expensive
- Custom hierarchies and updates required days of FTE effort
- Hierarchies managed through text files and Excel worksheets

Solution

This security organization leveraged Datavail's DRM PeopleSoft Adaptor to proactively manage changes in master data across operational, analytical, and enterprise performance management silos.

Benefits Achieved

- Centralized Enterprise Data Maintenance Single Version of the Truth
- Consistent processing and guidelines, transparency
- Automated integration from the general ledger
- Tremendous operational efficiency and cost savings (people, processes)
- Updates now occur in timely fashion
- Transaction history of all updates
- Versioning is clean with the ability to quickly run monthly comparison reporting
- Saved time and resources spent otherwise reconciling reports and measures across business units

About Datavail
