

Pathway to Your Oracle EPM Future

End of Support for Hyperion 11.1.x is around the corner. Have you decided whether to stay on-prem or move to the cloud?

End of Premier Support is December 2021

Top 6 Factors to Consider

Business requirements:

Does your existing on-premises environment fulfill your current and future business requirements? How do these compare with the functionality of the cloud?

Business risk:

If you're happy with on-premises, a cloud migration could be a risk—but the cloud also offers benefits such as improved business continuity and disaster recovery, decreasing the existential risk to your business.

The size and complexity of your on-premises footprint:

A highly complex on-premises environment can be unwieldy, causing you to contemplate a move to the cloud—but this complexity also makes it more difficult to migrate in the first place.

The maturity of the environment:

If you rely on legacy on-premises IT, make sure that a move to the cloud will let you maintain these integrations.

The amount of time and money invested:

What resources can you devote to a cloud migration project? Will cloud or on-premises be more cost-effective in the long run?

Future plans:

How will cloud or on-premises fit your business in the medium and long term?

Which Path Should You Take?

Upgrade to 11.2

- ✓ Oracle support through 2030
- ✓ Large EPM footprint
- ✓ Security stays in-house
- ✓ Complex environment-friendly

Datavail completed one of the country's first EPM 11.2 upgrades

Migrate to Infrastructure Cloud

- ✓ Keep current on-prem apps, but gain cloud benefits
- ✓ Cloud security
- ✓ Complex environment-friendly
- ✓ Mobile access
- ✓ Additional flexibility & scalability

Datavail has migrated one of the world's largest Oracle applications footprints to IaaS cloud.

Migrate to Oracle EPM SaaS

- ✓ Gain cloud benefits
- ✓ Newest features & functionality
- ✓ Mobile access
- ✓ Cloud security
- ✓ Flexibility & scalability

Datavail has successfully and efficiently moved hundreds of companies to Oracle EPM Cloud.

Contact Datavail today for support in choosing the right pathway for your organization, building your roadmap, and executing your upgrade or migration.
