

24x7 Managed Services and Consulting for Oracle Business Intelligence, Data Warehousing, Oracle EPM, Oracle BI Cloud Service & Planning Budgeting Cloud Service Implementations done right - the first time.

Move Beyond Traditional Consulting Promises

Datavail's experienced BI and Analytics expert consulting team specializes in managed services and operational support for integrations, implementations, and upgrades for applications across the Oracle stack. If you're looking for best practices, project leadership, staff augmentation, or support for Oracle BI, BICS, OBIA, Hyperion Planning or Essbase, we are your go-to consultants. From remote Oracle BI or Hyperion Administration services, to advanced enterprise data management and business intelligence, our team can support your requirements.

Our Wheelhouse is Where We Shine

Our team focuses on using our proven project methodology to deliver successful implementations and support in the following areas:

- ▲ Oracle BI (OBIEE)
- ▲ Oracle BI Applications
- ▲ Oracle BI Cloud Service
- ▲ Oracle Data Integrator 11g/12c
- ▲ Application/System Upgrades
- ▲ Data Warehousing
- ▲ Predictive Analytics
- ▲ Hyperion Planning
- ▲ Hyperion Essbase
- ▲ Reporting/Analytics
- ▲ ERP Analytics
- ▲ Informatica
- ▲ Amazon EC2
- ▲ Infrastructure

“ It was great to have a single consulting partner that could help get our Oracle BI and Hyperion Planning implementation into high gear. They were knowledgeable and had everything from Infrastructure and architecture to training and support. ”

Vitaliy F.,
VP of Finance, YamanaGold

With domain expertise in the public sector as well as higher education, finance, mining, retail banking, public safety and human resources industries, our team has the right experience and focuses on the customer success that Oracle customers deserve. Let us help your software implementation investments achieve their ROI.

ORACLE Platinum Partner

Proven Hyperion & Oracle BI Methodology

- Learn our best practice approaches to delivering successful BI & EPM projects.
- Speed to project start and delivery.
- Emphasis on knowledge transfer & training.

Pre-Built Analytics & DevOps Solutions

- We are the first company to create plugin products and solutions for Oracle BI.
- These solutions give us distinctive knowledge of Hyperion and Oracle BI inner workings.
- We've helped develop custom internal applications solutions for customers.

Variety of Experiences Across Industries

- The diversity of our experience allows customers to benefit from our ability to design and architect solutions "outside the box."
- Human Resource, Procurement & Spend, Supply Chain, Student Information, Transportation, Retail, Utility, and Financial Analytics. Check!

24x7 Managed Services for Oracle Analytics

- System Management & Monitoring
- Data Warehousing Monitoring for Load Completion
- Weekly Incremental Backups
- Basic BI Administration functions & tasks

Accelerator Products for Implementations

- Our in-house products such as Oracle BI Amelia accelerate development & migration.
- Other tools, scripts, and templates are delivered to accelerate delivery.

We Staff the Best. You Get the Best.

- Our team's backgrounds vary in core technologies and domains that allow us to architect scalable solutions.
- We can build solutions from scratch, provide a few of our own, and solution architects are certified for Oracle BI Applications modules.

We Understand BI/EPM ROI to the Max

- 65% of IT projects fail. We mitigate this risk for you.
- We understand your investment in software and resources and want to see you succeed.
- Do you know how to measure the ROI for an EPM and BI project? We do.
