

## Datavail APM Performance Testing Product Overview

Our Application Performance Management (APM) platform developed by Accelatis, which was acquired by Datavail in 2017, applies consistent, measurable, and repeatable activity to your Hyperion instance to identify scalability issues before they affect real users in production.

### Don't have time for Hyperion performance testing? You do now.

Skip the week of technical configuration to get performance testing up-and-running – our APM platform works out-of-the-box. It is:

- ◆ **Quick:** Up and running in hours instead of weeks
- ◆ **Easy:** Oracle Hyperion scripts come out-of-the-box.
- ◆ **Flexible:** Get enhanced monitoring & performance – leverage with the other Accelatis components.
- ◆ **Cost Effective:** Shorter duration testing cycles = reduced costs. Reduce typical cost for Upgrades & Migrations by 50%.
- ◆ **Empowering:** Uniquely powerful and useful to both IT and Finance with easily digestible and actionable results.
- ◆ **Powerful:** Replay your past user activity for more accurate testing – providing immediate correlations

### Know what will happen before it happens

#### Simplicity

You don't have to design your own performance test; we can replay historical activity when used in conjunction with our User Experience Monitoring.

#### Visibility

Our platform presents the data and provides a single view of end user and system-level performance.

#### Efficiency

We emulate hundreds or thousands of concurrent users to apply production workloads to any Oracle EPM environment.

#### Preparation

We enable you to know what will happen before it happens.
