

Grow & Transform Operations with Managed Applications

Application Development & Maintenance Managed Services

We help your organization improve your IT capacity and deploy smoothly operating applications that support your business goals. Your senior IT staff can move away from front-line run activities and focus on strategies to grow and transform operations.

Whether you need augmentation for your in-house IT development team or you're searching for more technical talent, we help you develop applications and maintain them on an ongoing basis.

Services That Help Applications Run Smoothly

Advisory Services

We'll help you uncover the best solution that meets the needs of your business.

Application Modernization

Enhance your applications to meet modern user and business requirements.

Cloud Migration Strategies

Move your applications and data to the cloud to take advantage of its benefits for your operations.

Performance Monitoring & Tuning

Optimize your application performance to drive productivity and improved outcomes.

Application Maintenance & Support

Empower on-site IT with help for build and deployment, hotfixes, minor enhancements and other application support needs.

Services That Increase IT Capacity & Throughput

Service Desk

Get 24x7 coverage for your service desk with incident management, vendor escalation and service reporting.

Application Monitoring

Monitor your applications 24x7, whether they're on-prem or in the cloud. Alerts automatically generate tickets and begin the triage process.

Platform Maintenance & Support

Keep your development platforms operating smoothly with health checks, administration services, system maintenance, patch support, security administration and audits of access logs, systems and licenses.

You Can Count on Datavail
