## JDE Upgrade Services

Stay competitive with our JDE upgrade services. We ensure a smooth transition to the latest JDE versions for advanced features, improved security, and better performance. Whether migrating from JDE World to JDE EnterpriseOne 9.2 or upgrading to other JDE versions to 9.2, our expert team will guide you seamlessly.

## JDE Managed and Support Services

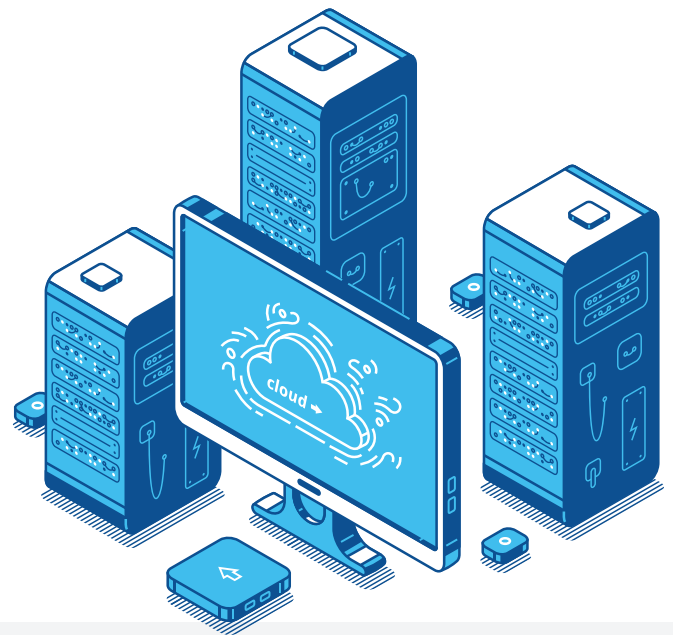

Want strategic support for usability, enhancement requests, or technical and functional support guidance to optimize your JD Edwards system? Our team can supplement or take over system administration, database administration, application administration, business analysis, and development, eliminating the worry of running mission-critical systems in your data center.

**Remote CNC Managed Services:** We offer remote JD Edwards CNC Managed Services tailored to your environment's needs. Benefit from 24/7 application monitoring, daily maintenance, stress/load testing, and comprehensive environment integrity testing.

**JDE Software Development:** Leverage our expertise for on-demand JDE software development, including customization, configuration, and reporting enhancements. Elevate your company's service delivery with tailored web services, applications, and seamless migration solutions. With Datavail, your JDE operations reach new heights of efficiency and differentiation.

## JDE Cloud Implementation Services

Embark on a transformative journey with our JDE Cloud Implementation services, designed to mirror your business aspirations. Based on the principles of Datavail, we offer a holistic approach that guides you through the cloud transition process. Our step-by-step approach includes options like Lift, Migrate, Modernize with Oracle Cloud Infrastructure (OCI), Amazon Web Services (AWS), or Azure, and even a full-fledged execution of Oracle SaaS.

Datavail's team of experienced JDE specialists is prepared to support your JD Edwards needs. Benefit from our extensive expertise to ensure seamless JDE implementation and management, whether on-premises, in the cloud, or a hybrid solution.

Datavail is a company of over 1,200+ professionals helping clients build and manage applications and data via a world-class tech-enabled delivery platform and software solutions across all leading technologies.
