

Data Platform End of Life 2026

www.datavail.com

January 2026

- Elasticsearch 7.17.x

February 2026

- Databricks 17.1
- GCP Cloud SQL PostgreSQL 13.23*
- Amazon Aurora PostgreSQL 13.9 LTS, 13.16 – 13.23**
- Redis 7.2

March 2026

- Databricks 12.2
- Amazon Neptune 1.1.1.0 – 1.2.1.2
- Databricks 17.2
- Amazon DocumentDB 3.6*
- MongoDB 8.2
- Amazon Aurora MySQL 3.08*
- Azure Database for PostgreSQL 11, 12, 13*
- Azure Database for MySQL 5.7*
- Amazon RDS for MariaDB 10.5.27, 10.6.19 – 10.6.21, 10.11.9 – 10.11.11, 11.4.3 – 11.4.5**

April 2026

- MySQL 8.0 LTS*
- IBM Db2 LUW 11.1
- Oracle GoldenGate 19.1*, 21.x

May 2026

- Amazon Aurora MySQL 3.09*
- Azure Database for MySQL 8.0*
- MySQL Cluster 7.6*

June 2026

- Amazon RDS for MariaDB 10.5*

July 2026

- GCP Cloud SQL MySQL 8.0
- MariaDB 10.6*
- SQL Server 2016
- Couchbase Server 7.2

August 2026

- Databricks 13.3

September 2026

- Galera Cluster MySQL

October 2026

- Amazon Aurora MySQL 3.04 (LTS)*

November 2026

- PostgreSQL 14
- Amazon RDS for PostgreSQL 14, 14.17, 15.12, 17.4**
- Amazon RDS for MariaDB 10.11.15, 11.4.9, 11.8.5**

December 2026

- Azure Database for PostgreSQL 14*
- Oracle Enterprise Manager Cloud Control 13.x*

* Extended Support available.

** Security Support available.

Aging data platforms create more than compliance and security risks. They make it difficult to take advantage of AI and advanced analytics capabilities that could differentiate your business. Your data infrastructure becomes a constraint instead of a competitive advantage.

Datavail, born in data and built for AI, has guided hundreds of organizations through end of support transitions, cloud migrations, and upgrades without disruption. Our data engineering experts understand the business risks: downtime, security vulnerabilities, operational strain, and the strategic cost of outdated infrastructure that can't support modern AI workloads.

Whether you need strategic consulting, hands-on migration support, or ongoing operational management, our global team of 1,200+ data professionals have deep expertise in the data platforms that form the foundation of innovation.
