Creating data is easy; turning that data into smart, actionable insights is hard. That's why Oracle built its GoldenGate software solution: so that organizations can have easier access to their ever-increasing volumes of enterprise data. Working with any number of disparate systems, even across time zones and continents, GoldenGate ensures the swift availability, routing, and delivery of database transactions.

What GoldenGate Offers Businesses

As IT environments grow more complex, both in the cloud and on-premises, organizations need a reliable way to extract value from a variety of big data sources. The challenges GoldenGate can solve include:

Availability
Businesses must maintain the performance of applications and databases with as little downtime as possible.

Speed
Information that's days or even hours old is often irrelevant; the more recent their data, the more competitive businesses can be.

Heterogeneity
On-premises, cloud, and hybrid environments all have data that must be integrated and replicated.

Integrity
Throughout all of these obstacles, the data must remain complete and accurate in order to be of any use.

By providing a real-time unified platform for moving, managing, and integrating data, Oracle GoldenGate solves all four of these challenges.

How Datavail Can Help with Oracle GoldenGate

Datavail is an industry leader in data management solutions, and our Oracle GoldenGate expertise is second to none. As an Oracle Platinum Partner, we offer a holistic suite of services for GoldenGate, including:

- Real-time data integration with Oracle and non-Oracle databases
- Process management
- Enhanced security with password, trail, and data encryption
- Routing and compression
- ETL and JMS integration
- Automated memory management
- Replication in heterogeneous environments
- Transactional change data capture and transformations
- Verification between operational & analytical enterprise systems

GoldenGate Advantages

Whether you're a small business or a global corporation, partnering with Datavail to bring GoldenGate to your organization will provide benefits such as:

- Deep Oracle technical expertise and a passion for problem-solving
- Easy access to the most business-relevant data
- Real-time insights with connections to other Oracle applications
- Drastically reduced levels of downtime and interruptions

Contact Datavail today to learn how you can use Oracle GoldenGate to harness your big data resources and start making better business decisions.
