

IT Solutions for the Transportation Industry

The most innovative transportation companies don't just collect data; they use it as a strategic asset to stay ahead of rising fuel costs and supply disruptions. Your systems should talk to each other—not slow you down when your team needs to move faster and compete harder.

From integrated systems and AI-powered analytics to automated compliance reporting and carbon tracking, the opportunities for innovation are vast.

Use Data to Fuel Your Business

Make faster, better decisions through unified data across all platforms

Integrate TMS, WMS, ERP, IoT, and telematics systems into a single source of truth—no more manual reconciliation or data silos.

Automate compliance reporting

Streamline safety, emissions, and regulatory reporting with secure data governance and automated workflows.

Forecast demand with confidence

Align capacity planning to real-time trends with custom dashboards, usage analytics, and historical models.

Optimize routes, fuel, and fleet performance

Use AI and predictive models to plan smarter routes, right-size your fleet, and reduce fuel usage and maintenance costs.

Reduce risk and protect cargo

Monitor driver safety, track cargo status, and set real-time exception alerts for faster response and less disruption.

Track your carbon impact

Build trust with customers and investors by capturing Scope 3 emissions data and visualizing your ESG performance.

Why Transportation Companies Choose Datavail

You need more than a generalist to align your technology with your business goals—you need a partner who understands the operational realities of logistics, fleet management, and compliance. Datavail's experienced team brings:

Industry-specific Expertise

From airlines and intermodal logistics to rideshare platforms and asset-heavy transport companies, we understand the business—and the tech.

Platform Integration Capabilities

We have deep experience integrating ERP, WMS, TMS, IoT, and custom systems into streamlined reporting and analytics environments.

Trusted Tech Partnerships

We are an Oracle Partner, AWS Advanced Tier Services Partner, and Microsoft Solutions Partner—backed by 1,200+ global professionals and 24x7 support.

Enterprise-grade Compliance and Security

We maintain ISO certifications and rigorous data governance standards to support your regulatory, contractual, and audit requirements.

Datavail Supports the Platforms that Power Your Operations

- Deep expertise in leading TMS, WMS, ERP, CRM, and telematics platforms
- Oracle Enterprise Applications
- Leading analytics solutions, including Power BI, Microsoft Fabric, and AWS QuickSight
- Leading data platforms, including Oracle, SQL Server, Snowflake, Databricks, IBM Db2, PostgreSQL, MySQL, and more
- Leading cloud hyperscalers, including AWS, Azure, and Oracle Cloud Infrastructure (OCI)

Let's Move Your Business Forward

If your transportation business is stalled by disconnected systems, manual processes, and reactive decision-making, it's time to take the wheel.
