

Microsoft Power Platform Agentic AI Services

Organizations are moving beyond AI that simply assists—they need AI that acts. As a Microsoft Solutions Partner, Datavail helps you build autonomous systems that make decisions, automate workflows, and deliver measurable business outcomes using Microsoft Power Platform.

Microsoft Power Platform Technologies We Support

Core Agentic AI Capabilities

Copilot Studio

Build conversational AI agents that understand context and execute tasks.

Power Automate

Create intelligent workflows that respond and adapt in real-time.

Power Apps

Develop AI-powered applications that learn from user behavior.

Power BI

Generate automated insights that trigger intelligent actions.

Power Pages

Deploy secure portals with embedded AI capabilities.

Datavail's Agentic AI Services

We deliver end-to-end agentic AI solutions—from strategy and assessment through development, deployment, and ongoing optimization.

Agentic AI Readiness Assessment

- Evaluate your current automation landscape and identify high-value agentic AI opportunities
- Build a prioritized roadmap with clear ROI projections for agentic AI implementation
- Identify governance, security, and compliance requirements

Agentic AI Strategy and Governance

- Establish organization-wide standards for AI agent development and management
- Create governance policies that balance innovation with security and compliance
- Design monitoring and control mechanisms for autonomous decision-making

Intelligent Workflow Automation

- Build intelligent agents with Copilot Studio that understand natural language and execute complex tasks
- Integrate agents across Microsoft 365, Teams, and custom applications
- Design autonomous workflows with Power Automate that adapt to changing conditions

AI-Powered Application Development

- Build custom Power Apps that embed agentic AI capabilities
- Modernize legacy applications with autonomous decision-making features
- Integrate AI agents into existing business applications

Enterprise-Scale Agentic AI Implementation

- Connect agentic AI systems to Microsoft Fabric for unified data access and real-time analytics
- Implement Microsoft Purview governance to ensure compliant and trustworthy AI operations
- Build scalable architectures that support hundreds of autonomous agents

Agentic AI Managed Services

- Continuous optimization of agent performance and decision accuracy
- Proactive maintenance and updates to keep agents aligned with business goals
- Training and enablement to help your teams work alongside intelligent systems

Transform your business with AI that does more than assist – it acts. Contact Datavail today to connect with our Microsoft Power Platform experts and start your agentic AI journey.
