

# Oracle APEX Solutions by Datavail

## Accelerate App Development. Modernize Legacy Systems. Drive Business Impact.

Oracle APEX (Application Express) is a low-code platform that enables rapid development of secure, scalable web apps—built directly on top of your Oracle Database. Leverage Datavail's Oracle APEX services to simplify operations and boost productivity. Whether you're looking to build custom applications, modernize legacy systems, or upskill your team for in-house development, our experienced APEX experts are here to support your journey from start to finish.

### How We Help

At Datavail, our APEX experts simplify and supercharge your Oracle environment:

- **Rapid Prototyping & Deployment** of custom business apps
- **Modernization of Legacy Forms & Reports**
- **Seamless Integration** with Oracle Cloud, EBS, and third-party systems
- **Mobile-Ready & Responsive Design** for anytime, anywhere access
- **Governance, Security & Performance Optimization**

Staffing & Training

## Real-World Use Cases

### 1. Field Service App for a Utility Provider

Transformed paper-based service logs into a mobile APEX app—reducing dispatch delays by 60% and increasing field engineer productivity.

### 2. Procurement Workflow for a Manufacturing Firm

Replaced Excel-heavy purchase order tracking with a role-based APEX dashboard—cutting approval times by 40% and improving audit readiness.

### 3. HR Portal for a Caribbean Resort

Built a self-service HR portal integrated with Oracle Cloud HCM—empowering 6,000+ employees with faster access to leave, payslips, and feedback modules.

**Modernization doesn't have to be complex. Let's simplify it with APEX.
