

Datavail Solutions for Oracle Analytics Cloud Service

Oracle Analytics Cloud Service (OACS) allows businesses to unite their disparate data analytics workflows within a single powerful cloud-based platform. Easily integrating into your existing IT environment, OACS combines your existing analytical capabilities with an array of agile, innovative features.

The benefits of Oracle Analytics Cloud include:

- Easy integration with the rest of the Oracle software suite
- Self-service discovery
- Inline data preparation
- Advanced custom analytics
- Automatic updates, maintenance, and configuration
- Low monthly subscription fee with flexible pricing

Why Move to Oracle Analytics Cloud?

- **Automatic visualization of data** once loaded into the OACS platform, giving you rapid insights into your data's structure and quality.
- **Diversity of data sources** with support for more than 50 data connectors, including native Oracle sources, open ODBC databases, and JDBC databases.
- **Collaboration capabilities**, including voice-driven analysis to build visualizations while you talk, channels for comments and discussions, and shareable visual stories.

- **Mobile-friendly software** that sends proactive analytics to your mobile devices, giving you the information you need whenever and wherever you are.
- **Freedom of choice**, letting you regain control over your company's data destiny and accommodate shifts in demand by adding and removing capabilities as necessary.
- **Analytical flexibility** that allows you to move data, applications, and your OACS deployment from the data center to the cloud (and vice versa) according to your desires.
- **Cost savings** in both infrastructure and development.

Why Choose Datavail for your Migration?

Datavail is an industry leader in cloud-enabled services and applications, and it has distinguished itself in a variety of ways:

- Oracle Partner with 17 specializations
- Oracle Accelerate solution provider
- Patented tech-enabled tools to improve speed and efficiency, and cut costs
- More than 100 successful implementations in on-premises, hybrid, and cloud environments
- Robust managed services tailored to each individual client's needs

ORACLE

Partner

We can support and manage all aspects of OACS, or help you migrate from another solution. Our services include:

- | | | |
|-------------------------------------|--------------------|-------------------------|
