

# Oracle E-Business Suite (EBS)

With more than a decade of experience, our industry-leading team has supported a wide range of large and small operations for applications across the Oracle technology stack, applying their unique expertise and knowledge across our entire client base.

With our 24×7 availability on a project or managed services basis, you'll receive the EBS and Oracle applications support you need when you need it, including:

- Consultations, assessments, and roadmaps for Oracle environments
- Implementations, integrations and upgrades of Oracle applications and databases
- Complex Oracle workload migrations to Cloud infrastructure, including Azure, AWS and Oracle
- Migrations of Oracle applications to a Cloud hosted infrastructure environment
- Monitoring and 24/7/365 managed services

## What Are Your Applications Challenges?

Some of the necessities our team has provided to our clients include:

- Reductions in support costs
- DBMS and/or EBS tech stack upgrades
- O/S Platform migration
- EBS cloud migration
- Adding OIM/OAIM
- Security initiatives to add encryption at rest data to protect PII/PHI
- Build warehouse by extracting data from EBS

- Changing backup process to improve RTO/RPO, conduct failover tests for audit needs
- Increase uptime, reduce downtime during maintenance activity
- Simplify the complexity of your environment

- Optimize and reduce batch cycle times
- 24x7 monitoring and response – incidents/service requests
- Improve throughput with existing infrastructure by fine tuning DB/applications

## The Support You Need When You Need It

As an Oracle partner with 17 specializations, our expert Oracle EBS team has executed hundreds of enhancements, plug-ins, scripts, health checks, and more to improve monitoring and performance for clients across the globe. We are experienced with everyday tasks as well as major projects.

- Optimization
- RAC setup and performance tuning
- Health checks
- Automation for maintenance activity
- Real-time data integration
- Upgrades
- OEM grid control
- Alert optimization

- Transactional change data capture
- Patch applications & impact analysis
- Routing, compression, verification, and process management
- Code release and migration
- Oracle ASM install/setup
- Custom solutions

## We Have the Technology

Datavail's team can leverage applications within the Oracle EBS stack as well as technologies and methods that offer supplementary benefits. Applications and technologies we know inside and out include:

- All applications in the EBS suite
- GoldenGate
- WebLogic
- Fusion
- RedHat

- RAC
- SOA Suite
- Damantra
- ODI
- Oracle SR Management

- OEM
- OBIEE
- EPM
- FMW
- Cloud DBA(AWS/Azure/OCI)

Contact us today to discuss how we can upgrade and/or migrate your Oracle EBS platform to the cloud; simplify a complex environment; build integration into your existing Oracle applications; increase performance and uptime; or take over the everyday management and monitoring of your EBS environment. Our leadership and continual exposure to multiple environments ensures we provide our clients with the best possible solutions.
