

# Power BI Support Services

Power BI

Microsoft Power BI is a simple, low-cost tool to give your users and executives a birds-eye view into what's happening across your company. But are they seeing exactly what they need to see to generate actionable insights?

## Our Power BI Expertise

Datavail's team of specialists can put the power of your data in your hands.

- Dashboards showcasing the most relevant KPIs
- Interactive reports customized to your business
- Connected data from a variety of sources
- Advanced analytics that uncover patterns and actionable insights
- Data modeling with efficiency
- Simplified data analysis

“

Most organizations adopt data visualization but struggle to visually represent the data in a way that maximizes its business value.

”

Gartner, "[How to Get More From Data Visualization](#)"

## See What Matters First

The best dashboards and reports with a solid data infrastructure offer the following:

High speed  
performance

Clarity and  
simplicity

Accessibility

Out-of-the-box  
thinking

Proactivity  
over reactivity

## How do we get you there?

Our services enable your self-service software to deliver on its promises:

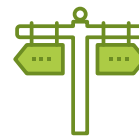

Custom dashboard  
design & development

Report generation

Ongoing maintenance  
and 24x7 support

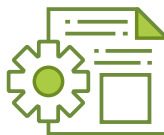

Roadmapping

Assessments &  
recommendations

Performance  
optimization

Data integration and  
ETL-related tasks

Take frustrating IT challenges out of the picture and let Datavail provide the expertise you need to deliver on the demands of your users and executive team.
