Move Your Business Forward with AppDev On-Demand

Sprint Teams

Changing any one application can impact an entire enterprise, and most companies aren't willing to take that risk. In fact, many companies delay upgrading existing technology because:

- They don't know exactly what they want it to do in the future
- They don't have the capital available today to invest in a whole system overhaul
- Their AppDev plans aren't completely concrete

Our innovative Sprint-Team-as-a-Service (STaaS) offers your business the technological and budgetary flexibility it needs to thrive in today's fast-driven economy. An STaaS opportunity gives you just the support and digital renovation services you need at any given moment to accomplish your immediate goals.

Application Development Services that Move Your Business Forward at its Own Pace

Improve Your Company's Functionality

Identify issues and priorities in the initial assessment with our team of experts.

Change Gears on the Fly

Sprint Teams are uniquely qualified to pivot as needed to emerging corporate demands and situations. This flexibility allows you to make changes to your anticipated technology developments as they become necessary.

Develop a Prospective Schedule

Sprint Teams are dispatched on an interval basis, usually for two weeks at a time, during which they address the customer's stated and sometimes emerging needs. You determine the frequency; we deliver the teams.

Choose the Services You Need

Datavail's professionals can improve your current application operations or can develop new applications needed for business growth.

Add Teams as You Need

There may be times when other equally critical technical work is needed, and having more than one Datavail Sprint Team available lets you address those emerging challenges without losing any momentum from your original process.

Maintain Your Company's Budget

With STaaS, you pay as you go so there's no need for a budget-busting capital investment in a whole system overhaul project. Instead, you engage and pay for each team as you need it for your particular purpose at that time.

Access Datavail's Full Slate of Services

With Datavail, you get not just our STaaS offering but also all our technical know-how to address any of your enterprise technology needs. Our managed services team is here to ensure that your business gets everything it needs to stay in business and remain competitive in both its market and industry.
