

Maintain Your Systems at Peak Performance

System Administration

We know that IT systems are a critical part of a company's success. That's why our system administration services, along with our data and application management services, provide you with an end-to-end managed application experience.

You'll get everything you need from one company that is dedicated to leaving you free to manage your business.

Comprehensive System Administration Services

- 24x7 Server Support (Windows, Linux, AIX, Solaris, etc.)
- Active Directory Infrastructure Services
- Multi-cloud Management Services
- ITIL based Service Management
- Service Delivery Management
- Backups & Recovery
- OS Support (Set-up, Upgrades, Migrations, Consolidations, Monitoring etc.)
- Hypervisor Management (VMware and Hyper-V)
- High availability advanced configurations
- Citrix (Planning, Deployment, Upgrades, Support)

A Complete Range of Managed Services

We offer a wide range of managed services that go far beyond monitoring. For example, our OS support includes full system administration and support with unmatched level of service, flexible terms and affordability.

We can help advise, plan and execute cloud migration, consolidation and/or virtualization. Many of our clients want help with auditing and compliance to monitor access and auditing for things such as access and licensing.

You may want to utilize all of these services, or select just those that you need to augment your existing team.
