

The Data Warehouse: The Cornerstone to Data Integrity and Data Accuracy

When it comes to business intelligence and reporting, data accuracy and integrity is kind of a big deal. That's why our BI experts at Datavail are leading the industry in building the infrastructure that is the cornerstone of good, clean data: the data warehouse.

Benefits of Data Warehousing

A properly built, configured, integrate data warehouse ensures the following:

- ◆ A single repository for all company data
- ◆ Consistency in reporting across employees, departments, and divisions
- ◆ The end of reliance on spreadsheets
- ◆ Easy access for all users
- ◆ Cloud flexibility, if desired

Datavail's Data Warehousing Team

Datavail has the leading experts in data warehousing heading up our Business Intelligence team. Think building a data warehouse is easy? Think again. We start at the very beginning to understand all aspects of your business so we can build the configuration that benefits you most. Our process includes:

- ◆ Requirements-gathering
- ◆ Evaluating business pain points
- ◆ Reviewing high-priority KPIs
- ◆ Analyzing data sources
- ◆ Technical/functional design of the data warehouse
- ◆ Change management planning
- ◆ Data governance
- ◆ ETL/development of the data warehouse by subject area

Good Data for Good Decision Making

Our work will empower your users and executives to get access to clean, accurate data so you can evaluate the following:

- ◆ Changes in the business across time
- ◆ Movements in employees, departments, and locations
- ◆ Financial impact of new initiatives
- ◆ Return on Investment of any product, department, or investment
- ◆ Employee retention and turnover

Contact our team today to learn how you can build a single source of the truth, and ensure the integrity of your data today.
