

Microsoft Azure Data Platform Migration and Modernization

Datavail's Azure specialists help you move from modernization planning to production with confidence. We assess your database estate, define the right Azure architecture and migration roadmap, then securely deploy and optimize your workloads for performance, cost efficiency, and long-term business value.

Modernizing Your Data Platforms

Modernizing your data estate starts with understanding where you are today and building a practical path forward. Datavail helps you from end-to-end with assessments, planning, deployments, and optimization.

Our Azure experts deliver these critical services, including:

- Database estate and dependency analysis
- Azure readiness, sizing, and cost assessment
- Target-state architecture and migration roadmap
- Business case and deployment planning
- Azure environment and landing zone preparation
- Phased database migration and validation
- Performance, security, and cost optimization
- AI-readiness

Microsoft Azure Technology Supported

Datavail has deep expertise in the Microsoft stack, including the latest Azure cloud technologies.

Azure Cosmos DB

NoSQL database for AI application development.

Azure PostgreSQL

Fully managed for application innovation.

Azure SQL Database

Scalable, relational database built for the cloud with AI and automation features.

Azure Database for MySQL

Advanced security and high availability.

Azure HorizonDB

Cloud-native, high-performance PostgreSQL- compatible service.

Azure DocumentDB

Open-source, MongoDB-compatible document database.

SQL Database in Microsoft Fabric

Azure SQL-based database available natively in Fabric.

Azure Managed Instance for Cassandra

NoSQL, managed data warehouse.

Modernize Your Data Platform with Confidence

Start with a prioritized roadmap. Move into deployment with clear scope, sequencing, and business outcomes. Talk with Datavail about assessing your data estate and building a practical path to Azure.
